

GENERAL KNOWLEDGE

General Instruction for Pneumatic Actuator

For your own safty, please read the instruction below before you inquiring / using our products.

Precautions in piping / installment

- According to the required driving torque and select corresponding actuator specifications by the output torque standard data in the 4Bar air pressure when install the valve. Actuator's torque should be more than 25% of the valve's torque requirement.

- The correct installation is directly affect the integral performance. The central axis of actuator MUST BE coaxial with the valve pole. Please notice the valve and the actuator needs to turn off the connection, examine the valve, after fix by using the right screw, opening and closing should not be any phenomenon about suddenly fast, suddenly slow, or stop.

- When piping with the large pneumatic valve, because of the weight of the valve, please install the support frame to avoid deformation of pipeline and valve body.

- Please confirm there's enough space for maintenance or manual operation.

- Actuator contains fine adjustment screw to ensure the opening and closing positions correct.

- To keep its best situation, please arrange regular inspect and change parts by its usage frequency. The air source should be kept dry and clean, and also drainage and sewage regularly for air filter components at the front end.

- Actuator's switch can be controlled by Single-acting or Double-acting 5 ports 2 ways solenoid valve.

- Please double check the pipeline direction, any leak wire connection before using the valve.

Main parts & Material

No.	Part name	Material
1	Gear output shaft	Carbon steel
2	Valve body	Extrude aluminum alloy
3	Cover	Die-cast aluminum alloy
4	Spring componment	Alloy steel
5	Fine adjustment screw	Stainless steel
6	Position indicator	PP
7	Piston	Die-cast aluminum alloy
8	Wear ring	NYLON 46
9	Cover screw	Stainless steel
10	O-ring	NBR

Malfunction detection and elimination

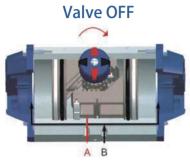

Situation	Check item	Solution		
	Check the solenoid valve, coil, and the core are malfunction or not.	Exchange solenoid, coil, clean impurities.		
Valve unable	Examine the pneumatic acuator, check sealing parts and cylinder.	Exchange sealing parts and cylinder.		
to move	Impurities stuck the piston inside the actuator.	Clean impurities, and replace broken parts.		
	If there's extra manual mechanism, its handle in the manual position.	Switch the handle to pneumatic control.		
	Insufficient pneumatic pressure.	Increase pressure.		
Valve works	Spool and other parts assembly uneven or too tight.	Increase actuator model spec.		
slow, inching	Actuator output torque too small.	Reassemble parts.		
	Pneumatic pipeline block or flow too small.	Remove clog, replace filter.		
Limit switch no signal feedback	Power circuit error or break.	Overhaul circuit.		
	Cam incorrect position in the switch.	Adjust Cam to the correct position.		
	Micro switch damaged.	Replace limit switch		

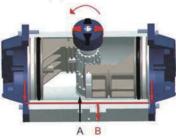

Principle of operation for Double acting torque.

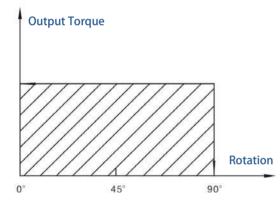

Compressed air input by **B Port**, make the piston and output shaft turn clockwise. Close the valve. Expel the air in the piston by **A port**.

Valve ON

Compressed air input by **A Port**, make the piston and output shaft turn counterclockwise. Open the valve. Expel the air in the piston by **B port**.

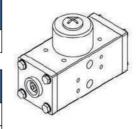

Double acting torque reference

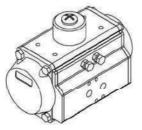

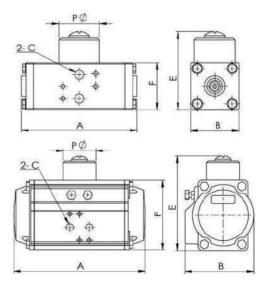

Model	Input pneumatic pressure (Torqure unit : Nm)								
	3.5 Bar	4 Bar	4.5 Bar	5 Bar	5.5 Bar	6 Bar	7 Bar	8 Bar	
AT32D	5	5.7	6.5	7.3	8	8.7	10	11.6

Pneumatic Valve Actuator

Model	AT32	AT50	AT63	AT75	AT88	AT100	AT115	AT125	
Power voltage	3 - 8 Bar								
Acting range		0-90° ± 5°							
Acting time		0.25 - 3 Sec.							
Internal structure		Rack drive							
3 Bar Air pressure torque (Nm)	4.5	10.0	17.6	34.9	54.9	79.8	129	168	
5 Bar Air pressure torque (Nm)	7.5	16.6	29.3	58.2	91.5	133	215	277	
7 Bar Air pressure torque (Nm)	10.5	23.3	41.0	81.4	128	186	301	388	
Environment	Temperature : -20 - 85°C ; Humidity : 10 - 90%RH								
Body Material	Aluminium								
Install direction			360 deg	grees or	nni-dire	ectional			

APL Series Actuator Limit Switches

Specifications Characteristics

Specifications Characteristics

Model	APL-210 APL-410					
ON / OFF Checking	Full open : Yellow	; Full close : Red				
Protect level	IP67					
Explosive-proof grade	Exd II CT6					
Terminals	8 points (0.8 - 2.5 m m²)					
Output signal	Switch * 2					
Electriad connection	2 * 1/2" NPT					
Body material	Aluminium die-casting					

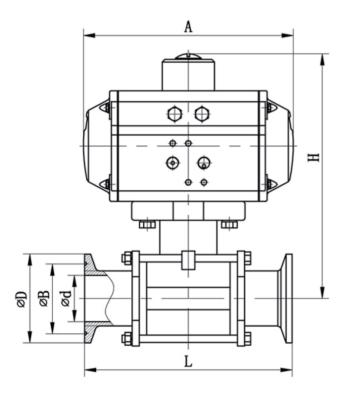

Pneumatic 3-PC T-Clamp Sanitary Ball Valve

Model	2C-S Series
Medium Temp.	-20°C - 150°C
ENV Temp.	-20°C - 60°C
Pressure	0 - 1.5 Mpa
Actuator Mat.	Aluminium alloy (Double / Single-acting)
Actuator pressure	0.4 - 0.8 Mpa
Valve body Mat.	Stainless steel 316
Valve seat Mat.	PTFE
Valve rod Mat.	Stainless steel 316
Valve cap Mat.	Stainless steel 316

* Actuators above the valve are divided into High torque and Low torque, size are different. Actual actuator dimension based on the real product.

Accessories for selection

- NAMUR Solenoid Valve -

Single Coil / Twin Coil AC110V / 220V ; DC24V

- Hand Wheel -

Body material : Die-casting steel Wheel material : Aluminium alloy Rotation angle : 180°

- Limit Switch -

8-Points terminal Body material : Die-cast aluminum C/W Active bracket Protect level : IP-67
